DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roessler et al. [US 6,128,817] in view of Rashleigh [US 3,349,480].

Roessler et al. discloses an inductive device [figures 1-3] comprising:

- a stack of insulating layers;
- a plurality of conductive layers disposed between the stack of insulating layers;
- a center hole [figure 1] for insertion of a magnetic core [140, 145]; and
- a plurality of continuous edges [via holes, 110] and a plurality of side edges [130, 135]

for connecting the plurality of conductive layers forming a coil structure for the inductive device.

Roessler et al. discloses the instant claimed invention except for the specific structure/arrangement of the edge plate and the continuous edge.

Rashleigh discloses conductive edge structure in a printed circuit for magnetic device [figures 2-4] including a plurality of insulating layers [48] having a plurality of conductive layers and a center hole with a plurality of continuous edge structure [60, 61, 63] for connecting the plurality of conductive layers.

Art Unit: 2832

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use the continuous edge design of Rashleigh in Roessler et al. for the purpose of facilitating manufacturing and alignment.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
